PROFESSIONAL SUMMARY

I am a passionate and curious IT Professional with experience in software development, IT infrastructure, and cybersecurity fundamentals. I have worked on real-world projects such as building websites, troubleshooting computer systems, and developing applications. I enjoy learning new technologies, solving problems, and collaborating with teams. I am eager to grow and contribute meaningfully by bringing my technical skills, security awareness, creativity, and enthusiasm to a forward-thinking company.

PROFESSIONAL EXPERIENCE

IT Infrastructure Intern

Prople BPO Inc. | Mandaluyong City ***June 2025 – November 2025***

• Managed user account provisioning and access control using Active Directory.
• Provided Level 1 IT support, troubleshooting hardware, software, and network-related issues for end users.
• Logged, documented, and resolved incidents and service requests using an IT ticketing system in accordance with support workflows.
• Performed routine endpoint security checks, including antivirus status verification and compliance monitoring using Broadcom Symantec Security.
• Monitored wireless network availability and connectivity to ensure operational stability.
• Performed network scanning and packet analysis using Nmap and Wireshark to identify active hosts, open ports, and analyze network traffic
• Configured and deployed company-issued laptops, ensuring domain integration and security policies.
• Supported data center networking operations, including LAN patching and structured cabling.
• Developed network infrastructure diagrams (MDF/IDF) to support documentation, troubleshooting, and audit readiness.
• Assisted in IT audits and compliance checks, supporting security and operational standards.

IT Support Specialist

PMX 515 Prime Inc. | Malabon City ***July 2024- February 2025***

• Implemented and configured SPF and DMARC DNS records, validating authorized mail servers, enforcing policy alignment, and reducing email spoofing and phishing risks.
• Troubleshot and resolved MacOS and Windows system issues, including email and domain-related problems.
• Supported domain email accounts, including configuration, access issues, and basic security troubleshooting.
• Developed and deployed the company's business website, ensuring functionality and usability.
• Designed and developed an inventory management system with booking, status tracking, and QR code integration as part of a capstone thesis project.

PROJECTS

Network Infrastructure Diagram

Prople BPO Inc. ***August 2025***

• Designed MDF and IDF network infrastructure diagrams for a simulated data center environment, improving network visibility and layout planning
• Developed structured cabling layouts and rack elevations using Microsoft Visio
• Documented end-to-end network topology, including switches, patch panels, and interconnections

Inventor-E: Inventory System with Booking and Equipment Tracking

Full Stack Developer | CAPSTONE PROJECT ***February 2025***

• Built a full-stack inventory management system with booking and equipment tracking features.
• Implemented user roles, real-time inventory updates, QR code scanning, and analytics dashboard.
• Applied policy and secure coding practices and basic input validation to reduce common web vulnerabilities.

PMX 515 Prime Inc. Business Website | Email Security Implementation

Full Stack Developer ***November 2024***

• Built and deployed a responsive professional business website using modern web design principles.
• Configured DNS records including SPF and DMARC to authenticate email servers and enhance domain security.
• Performed detailed email flow testing and validation to ensure proper policy enforcement.
• Applied access controls and account security measures to protect business email systems.

SKILLS

Basic – Intermediate Knowledge about

Network & Endpoint Security: TCP/IP, DNS, HTTP/S, Wireshark, Nmap/Zenmap, firewall rules, endpoint protection (Symantec)
Security Operations: Log analysis, SIEM concepts, incident triage (SOC L1), threat detection (phishing, malware, brute force, web attacks), incident reporting & escalation
Systems: Windows, Linux, macOS, Active Directory, user access management, Google Workspace
Threat Detection & Testing: Web reconnaissance, vulnerability assessment, Burp Suite, Gobuster, DIRB, Hydra, Metasploit
Programming & Development: PHP, MySQL, SQLite, Firebase, MS SQL Server, HTML/CSS, React, Tailwind CSS, Laravel, Git, JavaScript, Python, Django
Soft Skills: Analytical thinking**,** attention to detail, adaptability, teamwork, continuous learning

CERTIFICATIONS & TRAININGS

• **CISCO:** Junior Cybersecurity Analyst
• **CISCO:** Introduction to Cybersecurity
• **TryHackMe:** SOC L1
• **TryHackMe:** SOC L2
• **TryHackMe:** Jr. Penetration Tester
• **TryHackMe:** Cyber Security 101
• **Globe Business:** Google Workspace Admin Training
• **Globe Business:** Google Workspace End User Training
• **Micro Pacific Technologies:** Ignite the Power of Cybersecurity with **Sophos**: A Rollout to a Safer Future
• Technical deep-dive workshop powered by **Rubrik and Microsoft**. (Data Protection & Cloud Security)

EDUCATION

School Name, Pamantasan ng Lungsod ng Valenzuela
Bachelor of Science in Information Technology ***September 2022- May 2026***
